

<b>Numero identificativo del concorso</b>	ACMA_01
<b>Titolo del programma di ricerca</b>	Ancient Mediterranean Archaeology and Cultures
<b>Descrizione del programma di ricerca</b>	The research program will focus on the field of the ancient Mediterranean and its post-ancient tradition and should specifically be concerned with a relevant sub-topic. These areas of study include but are not limited to: archaeology, conservation, architecture, physical-anthropology, history, art, philology, technology, museology, and management. The program will be characterized by a contextual and interdisciplinary approach and can adopt either a macro or a micro scale. The candidate will carry out their research in close collaboration with institutional staff and will participate in the teaching and supervision activities of the School. Preferential experience includes conducting international research, competing in competitive research calls, and performing collaborative work. By way of example, the research areas already active at the School include: analysis of the interconnections between cultures and Mediterranean centers; issues concerning central-southern Italy and the Vesuvian sites; the interaction between historical, literary and archaeological documentation; reflection on digital corpora and new forms of documentation of testimonies; the sector of restoration, conservation and good practices in heritage management.
